Annual Progress Report - Calendar 2017

Substances for which toxic substance reduction plans have been prepared:

Substance	CASRN
Particulate Matter ≤ 10 microns (PM ₁₀)	NA - M09
Particulate Matter ≤ 2.5 microns (PM _{2.5})	NA - M10

Plan Objectives

Wherever technically and economically feasible, Con-Cast Pipe will reduce the use and release of Particulate matter less than or equal to 10 microns (PM₁₀) and Particulate Matter less than 2.5 microns (PM_{2.5}) in full compliance with all federal and provincial regulations. Toxic substance reduction will be an ongoing effort at Con-Cast Pipe, and they will continue to monitor technological advancements to ensure that options that are both technologically and financially viable are implemented at their facility.

Toxics Reduction Progress

The overall creation of PM₁₀ and PM_{2.5} increased slightly in 2017 due to a slight increase in the quantity of finished product manufactured during the calendar year relative to 2016.

Plan Implementation Progress

There were no reduction options identified in any of the plans for the above noted substances that were identified as being both technically and economically feasible. As such, there were no timelines presented in the reduction plans for the above noted substances. However, Con-Cast Pipe will continue to explore and investigate potential reduction options as they arise as part of their sustainability program.

As there were no anticipated reductions noted in each of the plans for the toxic substances noted above, there were no reductions of any toxic substances during the reporting period that would be attributable to any reduction plan.

Report Certification

As of May 31, 2018, I certify that I have read the reports on the toxic substance reduction plans for PM₁₀ and PM_{2.5} and am familiar with their contents and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
