1,2,3,4,6,7,8 - HpCDF	67562-39-4
1,2,3,4,7,8,9 - HpCDF	55673-89-7
OCDF	39001-02-0
Polychlorinated Dibenzo-P-Dioxins & Polychlorinated Dibenzofurans	NA - 11
Hexachlorobenzene	118-74-1
Particulate Matter $\leq 10 \mu\text{m}$ (PM ₁₀)	NA - M09
Particulate Matter $\leq 2.5 \mu\text{m}$ (PM _{2.5})	NA - M10

Plan Objectives

The reduction of toxic substance use, creation and releases is a priority for Kaiser Aluminum forming part of their sustainability programs and EMS. Their goal is to reduce the creation and release of Zinc and its compounds, Hexachlorobenzene, Polychlorinated Dibenzo-P-Dioxins & Polychlorinated Dibenzofurans and their 17 congeners, PM₁₀, and PM_{2.5} where technically and economically feasible. No technically and economically feasible reduction options for these substances were identified. Kaiser Aluminum will continue to monitor new technological advancements to ensure that reductions options that are both technologically and financially viable are implemented at their facility.

Toxics Reduction Progress

Overall the quantities of dioxins, furans, Hexachlorobenzene, PM₁₀ and PM_{2.5} created and released by the facility decreased due to a slight decrease in the facility's overall production in 2017. The increased quantity of Zinc released to air, used and contained in-product are the result of an increase in the production of various zinc containing alloys produced. The increased quantity of Zinc recycled are due to an increase in the quantity chip and dross waste produced during the calendar year.

Plan Implementation Progress

There were no reduction options identified in any of the plans for the above noted substances that were identified as being both technically and economically feasible. As such, there were no timelines presented in the reduction plans for the above noted substances. However, Kaiser will continue to monitor new technological advancements to ensure that reduction options that are both technologically and financially viable are implemented at their facility.

As there were no anticipated reductions noted in each of the plans for the toxic substances noted above, there were no reductions of any toxic substances during the reporting period that would be attributable to any reduction plan.

Certification Statement

As of May 25, 2018, I certify that I have read the reports on the toxic substance reduction plans for Zinc and its compounds, Hexachlorobenzene, Polychlorinated Dibenzo-P-Dioxins & Polychlorinated Dibenzofurans and their 17 congeners, PM10, and PM2.5 and am familiar with their contents and to my knowledge the information contained in the report is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.

The original version of this report is signed off by:

I, the highest ranking employee, agree with the certification statement(s) above and acknowledge that by checking the box I am electronically signing the statement(s). I also acknowledge that by pressing the 'Submit Report(s)' button I am submitting the facility record(s)/report(s) for the identified facility to the Director under the Toxics Reduction Act, 2009. I also acknowledge that the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 provide the authority to the Director under the Act to make certain information as specified in subsection 27(5) of Ontario Regulation 455/09 available to the public.
