Annual Progress Report - Calendar 2017

Substances for which toxic substance reduction plans have been prepared:

Substance	CASRN
PM2.5	NA - M10
PM10	NA - M09

Plan Objectives

The reduction of toxic substance use, creation and releases is a priority for Vari-form forming part of our sustainability programs and EMS. Our goal is to reduce the creation and release of PM₁₀ and PM_{2.5} where technically and economically feasible. No technically and economically feasible reduction options for reducing PM₁₀ and PM_{2.5} were identified. The facility will continue to monitor new technological advancements to ensure that reduction options that are both technologically and financially viable are implemented at our facility.

Toxics Reduction Progress

In terms of quantities of the substances reported, the current reporting year saw slight decreases for both PM10 and PM2.5 due to a decrease in the facility's production in 2017. There were no deviations from the Toxic Substance Reduction Plans prepared for either substance during the calendar year. In addition, there were no steps taken outside of the plan that would affect the quantities of substances reported.

Plan Implementation Progress

No technically and economically feasible reduction options for reducing PM₁₀ and PM_{2.5} were identified. The facility will continue to monitor new technological advancements to ensure that reduction options that are both technologically and financially viable are implemented at the Facility.

Certification Statement

As of June 1, 2018 I certify that I have read the reports on the toxic substance reduction plans for the above noted substances and am familiar with their contents and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
