Substance Accounting

Substance:	Selenium (and its compounds)
CAS Number:	NA - 12
On a facility-wide basis:	
Amount that entered the facility as the substance itself or as a constituent of another substance:	Amount Units
	>100000 - 1000000 kg
The amount of substance that was created:	0.000 kg
The amount of substance that was contained in product:	>10000 - 100000 kg
On-site releases from the facility to air, water and land, as well as on and off-site disposal and off-site recycling can be viewed by searching for this facility at http://www.ec.gc.ca/inrp-npri/default.asp?lang=en	

Substance:	Manganese (and its compounds)
CAS Number:	NA - 09
On a facility-wide basis:	
Amount that entered the facility as the substance itself or as a constituent of another substance:	Amount Units
	BT Mg
The amount of substance that was created:	BT Mg
The amount of substance that was contained in product:	BT Mg
On-site releases from the facility to air, water and land, as well as on and off-site disposal and off-site recycling can be viewed by searching for this facility at http://www.ec.gc.ca/inrp-npri/default.asp?lang=en	

Substance:	Nickel (and its compounds)
CAS Number:	NA - 11
On a facility-wide basis:	
Amount that entered the facility as the substance itself or as a constituent of another substance:	Amount Units
	BT Mg
The amount of substance that was created:	BT Mg
The amount of substance that was contained in product:	BT Mg
On-site releases from the facility to air, water and land, as well as on and off-site disposal and off-site recycling can be viewed by searching for this facility at http://www.ec.gc.ca/inrp-npri/default.asp?lang=en	

Annual Progress Report - Calendar 2017

Substances for which toxic substance reduction plans have been prepared:

Substance	CASRN
Selenium (and its compounds)	NA - 12

Plan Objectives

All employees at Walters Inc. will be involved in the reduction of toxic substance use, creation and releases. Our goal is to reduce the creation of Selenium where technically and economically feasible by the timetable noted in the plan. We will achieve these reductions through on-site reuse or recycling and improved operating practices.

Toxics Reduction Progress

Variations in the reported quantities have been observed in several categories including quantity used, contained in product and recycled. In the case of quantity used and contained in product, variations are due to the increase in overall production by the facility. In the case of quantity recycled, variations are due to the increased mass in the total scrap produced by the facility.

Plan Implementation Progress

Steps taken during the reporting period were those outlined in the plan for these substances and include operational steps for continuous improvement in on-site re-use and minimization of rework. There were no deviations from or amendments made to the plan in the reporting period. The timetable outlined in the plan will be met.

As the anticipated reductions noted in each of the plans for the toxic substances noted above are based on the timelines that span 1 to 3 years there were no reductions of any toxic substances during the reporting period attributable to the steps outlined in the plans.

Certification Statement

As of May 23, 2018 I certify that I have read the reports on the toxic substance reduction plans for the above noted substances and am familiar with their contents and to my knowledge the information contained in the reports is factually accurate and the reports comply with the Toxics Reduction Act, 2009 and Ontario Regulation 455/09 (General) made under the Act.
